FIT.LY EXECUTIVE PRESENTATION

Subscriber Churn Analysis & Resolution SLA Strategy

Data-driven identification of operational bottlenecks and strategic retention initiatives for 400 subscriber accounts.

OVERVIEW

Executive Summary & Key Findings

BASELINE CHURN

28.5%

Overall customer attrition rate across all 400 subscription accounts.

MEDIAN RESOLUTION

9.04h

Overall median support ticket resolution latency across all tiers.

FREE TIER CHURN

40.95%

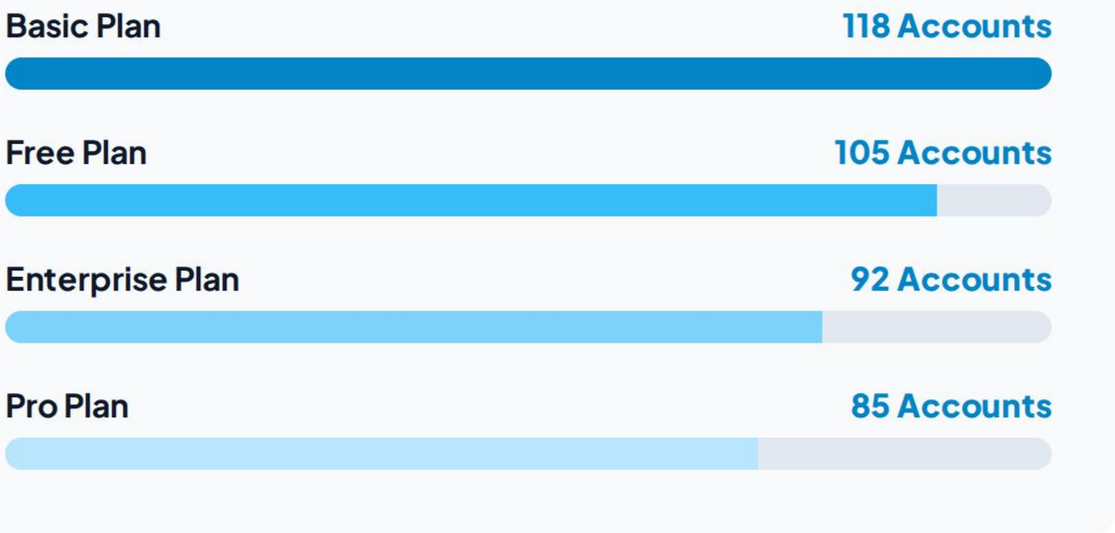

Highest churn density, nearly double the paid plan tier average.

Core Strategic Insight

Support delays drive customer churn. Churned accounts wait nearly 3× longer for resolution than active subscribers (18.50h vs 6.50h).

GRAPHIC 1 ANALYSIS

Account Distribution Across Subscription Tiers

Volume Concentration

Basic (118) and Free (105) tiers combine for 55.75% of the total customer base.

Premium Segment

Enterprise (92) and Pro (85) accounts constitute 44.25% of higher-ARR subscribers.

GRAPHIC 2 & 3 ANALYSIS

Support Resolution Delays Direct Driver of Attrition

Active Subscribers

6.50h

Median Resolution Time

Interquartile range between 4.50 and 8.00 hours.

VS

Churned Subscribers

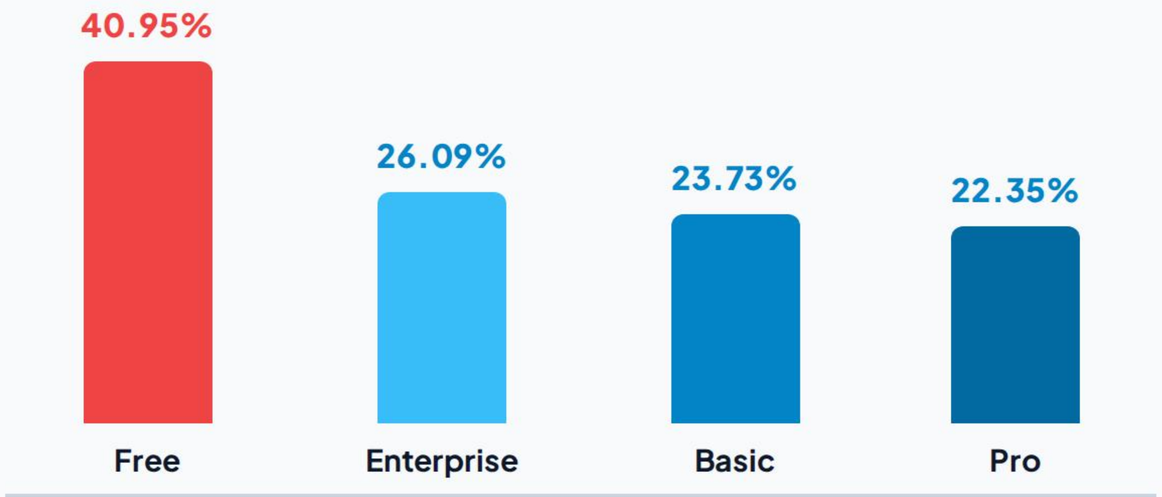

18.50h

Median Resolution Time

Severe bottleneck tail extending past 30.00 hours.

GRAPHIC 4 ANALYSIS

Churn Rate Disparity Across Subscription Tiers

Note: Dotted Baseline Average across all plans equals 28.50%.

Free Tier Vulnerability

Free plan accounts churn at 40.95%, representing acute onboarding drop-off.

Paid Tier Stability

Paid tiers remain stable between 22.35% and 26.09% churn rate.

KPI DEFINITION

Primary Business Metric: Support Resolution Time

Target SLA Standard

< 6.0h

Establish 6.0 hours as the maximum median resolution benchmark to align churned metrics with active subscriber levels.

CRM Alert Threshold

12.0h

Trigger automated Customer Success intervention alerts when open tickets cross 12.0 hours without resolution.

ACTION PLAN

Strategic Business Recommendations

01

Priority SLA Routing

Restructure support queues to resolve critical billing and technical tickets under 6.0 hours.

02

Automated Intervention

Deploy automated CRM triggers at 12.0 hours for customer success leads to engage high-risk accounts.

03

Free Tier Self-Service

Launch interactive onboarding guides and self-service FAQs to reduce ticket volume and early trial drop-off.
